

User Manual for Registration Entities

European Vehicle Register (EVR)

Released by European Union Agency for railways

The present document represents the views of the European Union Agency for Railways and is a non-legally binding document. It does not represent the view of other EU institutions and bodies. Furthermore, a binding interpretation of EU law is the sole competence of the Court of Justice of the European Union.

This manual provides explanations to facilitate the use of the European Vehicle Register.

This manual is publicly available and will be kept updated.

The reader should refer to the website of the European Union Agency for railways for information about the latest available edition.

1. Introduction

1.1. About EVR

The European Vehicle Register (EVR) is a web-based tool that is used by Keepers to submit applications for vehicle registration and by Registration Entities (REs) to manage the allocation of vehicle numbers and to record vehicle registrations and their updates.

As with the ECVVR, the EVR vehicle registration process is managed at national level.

The EVR will enable:

- Keepers and other stakeholders to request access to the application;
- Keepers to submit applications for vehicle registration and their updates to the RE of the relevant Member State (MS)
- REs to manage user accounts;
- REs to manage submitted applications for vehicle registration and allocation of EVNs
- Other stakeholders to consult vehicle registrations

1.2. Definitions and Abbreviations

<i>Acronym/Abbreviation</i>	<i>Definition</i>
Agency	European Union Agency for Railways established by the Regulation (EU) 2016/796 of the European Parliament and of the Council
Applicant	A natural or legal person requesting an authorisations for placing a vehicle on the market
Area of use of a vehicle	A network or networks within a Member State or a group of Member States in which a vehicle is intended to be used, as referred to in Article 2 of Directive (EU) 2016/797
ARS function	Application, Registration and data Storage functions
ATMF	Uniform Rules concerning the Technical Admission of Railway Material used in International Traffic (ATMF — Appendix G to COTIF)
Authorising entity	Entity (NSA or the Agency) that authorised the vehicle for placing on the market
Authorisation	Authorisation for placing on the market
C-ARS function	Application, Registration and data Storage (ARS) function (centralised)
COTIF	Convention concerning International Carriage by Rail
D-ARS function	Application, Registration and data Storage (ARS) function (decentralised)
DSC function	Data Search and Consultation function
ECM	Entity in Charge of Maintenance
ECVVR	European Centralised Virtual Vehicle Register, as defined in Decision 2007/756/EC
EIN	European identification number
EVN	European vehicle number

<i>Acronym/Abbreviation</i>	<i>Definition</i>
EVR	European Vehicle Register, as referred to in Article 47 of Directive (EU) 2016/797
ERA	European Union Agency for railways. See above “Agency”
ERATV	European Register of Authorised Types of Vehicles, as referred to in Article 48 of Directive (EU) 2016/797
GDPR	Regulation (EU) 2016/679
IM	Infrastructure Manager
ISO	International Organisation for Standardisation
IT	Information Technology
NSA	National Safety Authority
NVR	National vehicle register referred to in Article 47 of Directive (EU) 2016/797
OPE TSI	Technical specification for interoperability relating to the operation and traffic management subsystem of the rail system within the European Union
OTIF	Intergovernmental Organisation for International Carriage by Rail
RDA function	Reference Data Administration function
RE	Registration Entity, which is the body designated by each Member State in accordance with Decision (EU) 2018/1614
RIC	Regulations governing the reciprocal use of carriages and brake vans in international traffic
RIV	Regulations concerning the reciprocal use of wagons in international traffic
RU	Railway Undertaking
TAF (TSI)	Telematics Applications for Freight (TSI)
TAP (TSI)	Telematics Applications for Passengers (TSI)
TSI	Technical Specification for Interoperability
UCA function	User Creation and Administration function
VKM	Vehicle Keeper Marking
VKMR	Vehicle Keeper Marking Register
VVR	Virtual Vehicle Register, as defined in Decision 2007/756/EC

2. User Manual

The present User Manual provides a description of the EVR application from the perspective of the Registration Entity (RE) user. The following chapters include descriptions of the User Interface, as well as step by step descriptions of how the RE user may complete certain tasks.

2.1. Homepage

2.1.1. Page composition

The European Vehicle Register (EVR) system has a web-based user interface and is accessible from any computer with an internet browser and network accessibility, provided that the user has an approved account. The system features are separated into a series of web pages based on the same standard template.

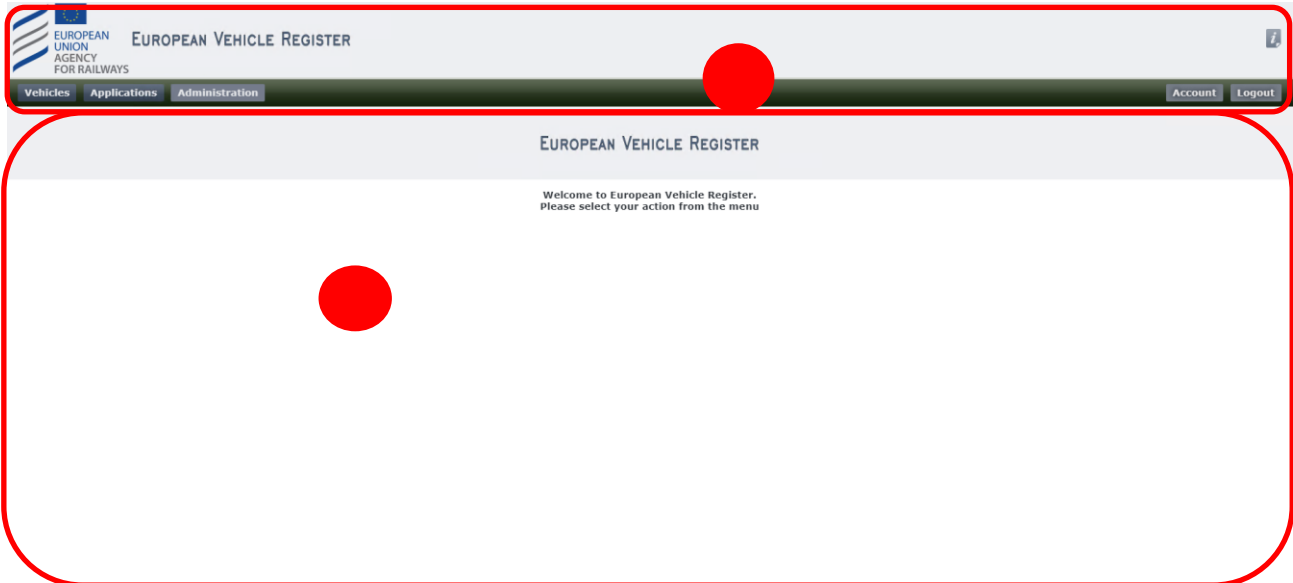

Figure 1: EVR Homepage

Each web page has the following sections (see Figure 1 above):

1. Header. This section is always visible and contains functionality that will always be available to the user, such as “Account”, “Logout” and help options. The menu options to navigate to the different application features are also displayed here.
2. Content. This section varies according to the Web page – more details provided in the following Chapters of the User Manual.

2.1.2. System navigation

From the EVR Homepage, users can navigate the application pages by clicking on the respective Header Menu options (see Figure 1)

2.1.3. Info

The user can access application help by clicking on the  icon on the top right corner of the web page. This will open a new pop-up window with information relevant to the particular Web page that the User is in.

Figure 2: Help Icon

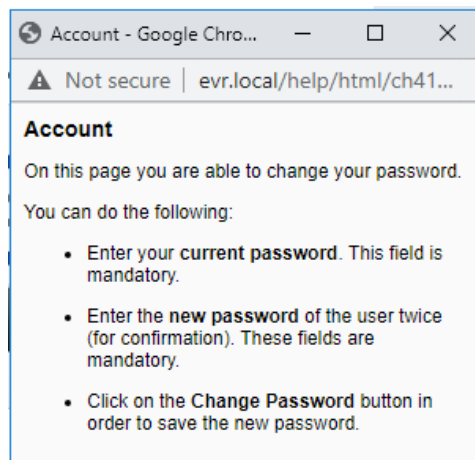

Figure 3: "Information" Icon pop-up window Example from "Account" Page

2.2. Access to EVR

2.2.1. EVR Account for Registration Entities

Registration Entities who wish to have access to EVR, should send an email to servicedesk@era.europa.eu and include in the email their organization codes, first name, last name and professional email addresses. Organization codes are a pre-requisite to EVR account creation and to have access to EVR.

Organisation codes are allocated to Registration Entities by the Agency. Registration Entities can request organisation codes by following the procedure described [here](#).

With the organisation code in hand, ERA EVR Administrators will be able to create EVR account with Registration Entity and Administrator roles.

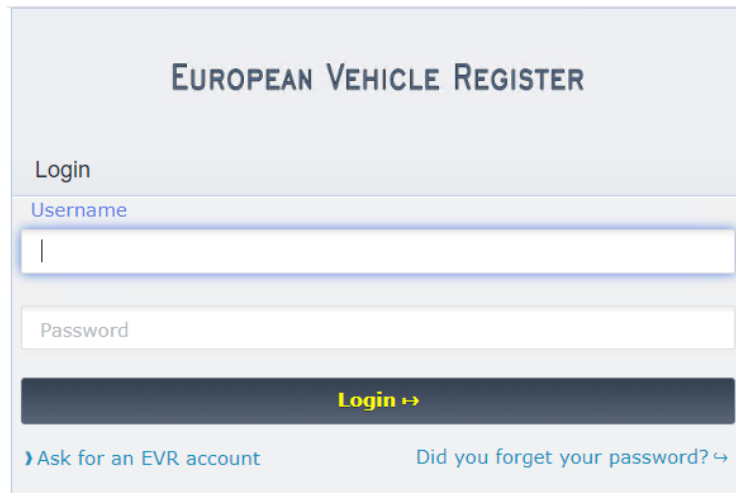

With this account the Registration Entities will be to create further accounts for their stakeholders (e.g. NSA, Other RE colleagues...) by logging into EVR.

2.2.2. Login

By entering the EVR URL in their browsers, the user can access the Login Page. Within the Login Page. The user should follow the below steps:

- Fill-in the “User name” text field.
- Fill-in the “Password” text field.
- Click on the “Log in” button.

Once the user logs in successfully, the home page of the EVR system will be presented (see Figure 1).

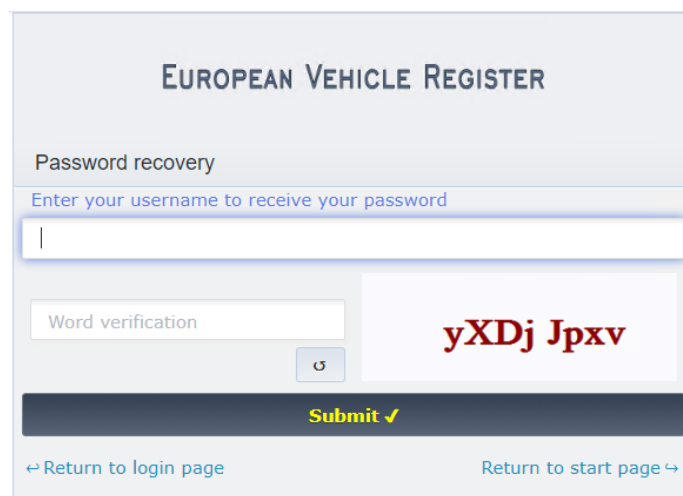

The screenshot shows the login interface for the European Vehicle Register. At the top, the title "EUROPEAN VEHICLE REGISTER" is displayed. Below it, the word "Login" is centered. There are two input fields: "Username" and "Password". A dark blue button with the text "Login" and a right-pointing arrow is positioned below the password field. At the bottom of the form, there are two links: "Ask for an EVR account" on the left and "Did you forget your password?" on the right, both with left-pointing arrows.

Figure 4: Login Page

2.2.3. Password Recovery

If a user has forgotten his/her password, he/she can click on the “Did you forget your password?” option on the Login Page. In this case, the following page is opened:

The screenshot shows the password recovery interface for the European Vehicle Register. At the top, the title "EUROPEAN VEHICLE REGISTER" is displayed. Below it, the text "Password recovery" is centered. A prompt "Enter your username to receive your password" is followed by a text input field. Below this is a "Word verification" section with a text input field and a small square button containing a character. To the right of the word verification input is a large, stylized red text "yXDj Jpxv". A dark blue button with the text "Submit" and a checkmark is positioned below the word verification input. At the bottom of the form, there are two links: "Return to login page" on the left and "Return to start page" on the right, both with left-pointing arrows.

Figure 5: Password Recovery

The user should follow the below steps:

- Fill-in the text fields: “Enter your username to receive your password” and “Word verification” (Captcha)
- Click on the “Submit” button.

The user receives an email with a link that redirects him to the password reset page as shown in Figure 7 below:

Figure 6: Password Reset

The user should follow the below steps:

- Fill-in the fields: “New Password”, “Password confirmation” and “Word verification” (Captcha)
- Click the “Change password” button.

The user can return to the Login Page by clicking on the “Return to login page” or the “Return to start page” options.

2.2.4. Logout

Having already logged in to the EVR application, the user can logout by clicking the **Logout** button which is available on the right side of the Heading ribbon, on all the EVR Web pages.

Figure 7: Logout

2.3. User Management by Registration Entities

- Users (e.g. Keepers, Owners, ECMs, ...) who need to have access to EVR, need to request an account via EVR (login page), select the roles they wish to have and enter their organization code. Based on the entered organization code, EVR will select the Registration Entity that will handle the request.
- The RE will receive the requests and approve or reject them

2.3.1. Approval or rejection of user accounts requests

The RE finds the user account that needs to be examined following the process for User Search in chapter 2.1.5.

The RE presses the Edit  Button and in the pop-up Menu he presses the  button so that his status is changed:

Figure 8: Approve-Reject User.

The respective User that their account has been approved receives an email to set a password.

2.3.2. Users accounts Creation by Registration Entities

In certain particular cases, REs may need to directly create accounts in EVR. For instance accounts for their colleagues.

In order to create a new EVR user, the RE user has to follow the steps described below:

Step 1: From within the “Administration” menu, click on the  button. This will open the dialogue:

Figure 9: Add user

Step 2: Complete the provided fields below:

- Username
- Email

- First and Last Name
- Comments (optional)
- Account Expiration Date (optional)

Figure 10: Create a new EVR user dialogue

Step 3: Complete the required fields for the “Access Profile” to be created

- Add the Organisation Code that the new user belongs to by using the search functionality, clicking on the  button. The Country Managing profile is automatically filled and becomes non-editable and the Organisation Name as well as the Organisation Name Aliases fields appear.

Figure 11: Organisation Details after inputting Org. Code

- Complete the “Role” field by selecting from the provided drop-down menu. More than one roles can be selected.
- Profile Expiration Date (optional)
- Comments (optional)

Step 4: Determine the user status:

- If the new user is already approved and can be granted immediate access upon the creation of their account, leave the “Status” option as 
- If it is not certain yet, and has to be decided at a later date, click on the  button to turn the status into .

Figure 12: Approval buttons

Step 5: If the above steps are completed successfully and the new account is ready to be created, click on the  button.

Figure 13: Add User button

The user that has been approved receives a notification email that his account has been approved and to set his password.

2.3.3. Update of User data

2.3.3.1. Update User: Modify User Details

To modify the details of a user account, the RE user has to follow the next steps:

Step 1: From within the “Administration” menu, search for the user you wish to edit.

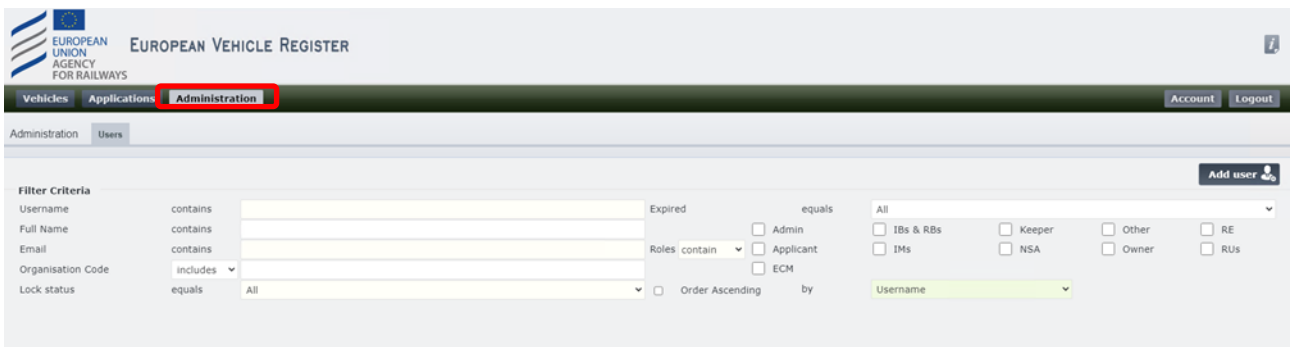

Figure 14: Administration-Search

Step 2: From the user search results table, identify the particular user and click on the  icon under the "Edit" tab. The dialogue to Edit the user will open, as shown in Figure 15 below:

Figure 35: Export Results

The screenshot shows the 'Export to:' options menu. It contains three icons: a green arrow pointing down to an XLSX file icon, an orange arrow pointing down to a CSV file icon, and a red X over a document icon labeled 'Cancel'.

Figure 36: Export Search Results Options

2.4. Search and management of Vehicle Applications

2.4.1. Search for Application for Vehicle Registration

By clicking on the “Applications” menu option on the ribbon that is available in all EVR pages, EVR will display the following screen, as shown in the Figure 37:

The screenshot shows the 'Applications' menu in the EVR interface. At the top, there is the European Union Agency for Railways logo and the text 'EUROPEAN VEHICLE REGISTER'. Below this, there are navigation tabs for 'Vehicles' and 'Applications'. The 'Applications' tab is active. The page displays 'Applications' and a 'Select your Registration Entity' dropdown menu with 'AT - AT' selected. Below the dropdown are two buttons: 'View Applications' and 'Create Application'.

Figure 37: Applications Menu

The user has to select the Registration Entity from the drop-down menu and then click on the **View Applications** option. The user will be directed to the Applications search page.

2.4.1.1. Search Criteria

To perform an Application Search, the User has the option to use the following criteria:

Figure 38: Application Search Criteria

2.4.1.2. Search Results

After clicking on the **Search** button, the system returns the Application results in the format presented in the below Figure 39:

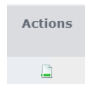

Applications									
ID	Application type	State of Application	Created by	Creation Date	Submission Date	Approval Date	Stub Number	Number of Vehicles	Actions
			State of the Application			Application Details			
222901	PreReservation	Submitted	k.styliaras	20/10/2021 09:51	20/10/2021 09:51:28		01815000SSSX	1

Figure 39: Application Search Results

The User can navigate the result pages as well as change the number of results displayed per page using the **10** **Results 1-2 of 2** functionality. Also they can reset the search using the **Reset** button.

2.4.2. Application Details View

By clicking  icon in the last column, Registration Entities can view more details of a particular Application. By selecting this icon, a new browser tab is opened that displays the Application details. The view will vary according to some characteristics of the application. This view contains the Tabs “Vehicle Characteristics” and “Standard Form” that will be shown in the next chapters. However, the elements that are presented throughout all the Tabs are listed below:

Colour-coded Ribbon:

Figure 40: Application Details Ribbon

This contains information about the “Application Type”, “Current Application State” and “Created by” and changes colour according to the Current Application State.

2.4.2.1. *Vehicle Characteristics*

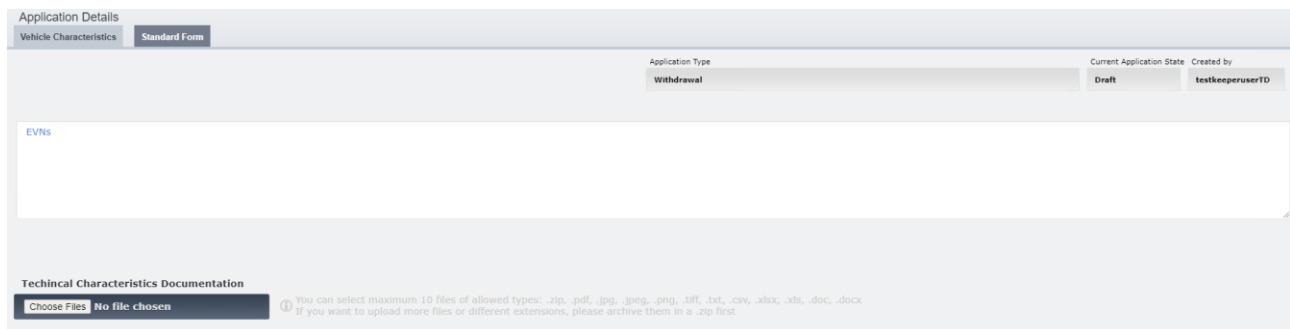

Figure 41: Application Details: Vehicle Characteristics Tab

On this Tab the user can:

- View the Vehicle(s) related to the Application
- Attach and/or View any Documentation (depending on the Current Application State)

2.4.2.2. *Standard Form*

On this Tab the user can view all the standard EVR Vehicle Details for the EVNs that are associated with this particular Application:

2.4.3. Decision on Vehicle Applications

Registration Entities can review, approve or reject vehicle applications that have already been submitted .
The RE needs to follow the following steps before starting reviewing the applications

2.4.3.1. Decision on New Pre-Reservation

The user can review and decide on whether he will approve or reject new Pre-Reservation application following the below steps:

Step 1: Search for a Pre-Reservation Application with “Submitted” Status and clicks on the “Actions” Button and redirected to the application

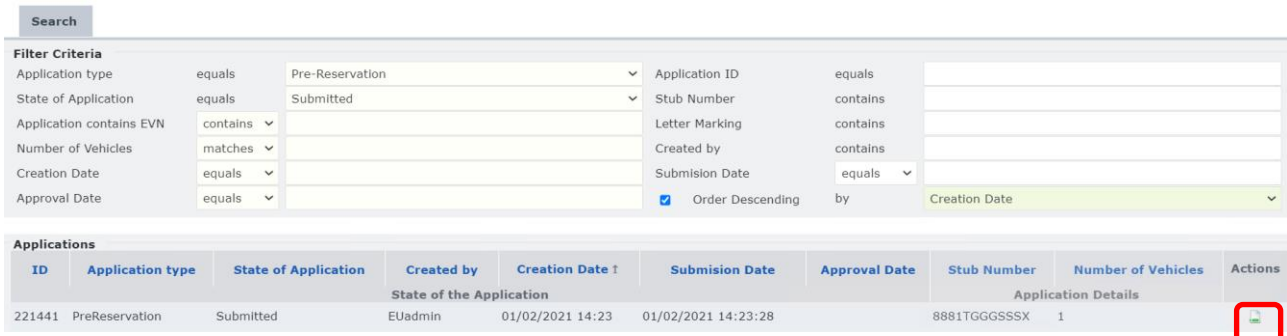

Figure 43: Submitted Pre-Reservation Application: Search

Step 2: Review the information provided for the Registration in the “Vehicle Characteristics” and “Standard Form” Tabs.

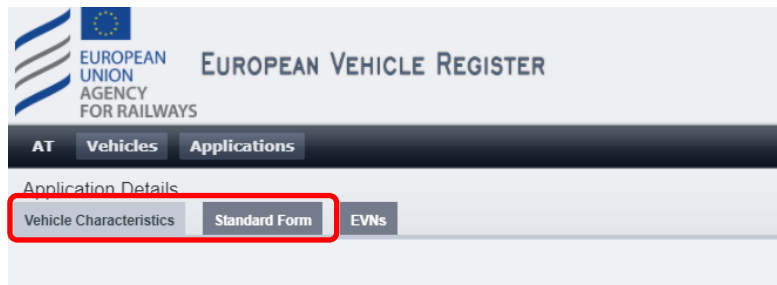

Figure 44: Review Application Details: “Vehicle Characteristics” and “Standard Form” tabs

a. To Approve the Application

Step 3a: If the information provided in the application are found to be complete and acceptable after the review done in the previous step, follow the steps below:

Allocate EVNs to the application

Select the ‘EVNs’ tab, the content of which can be viewed below:

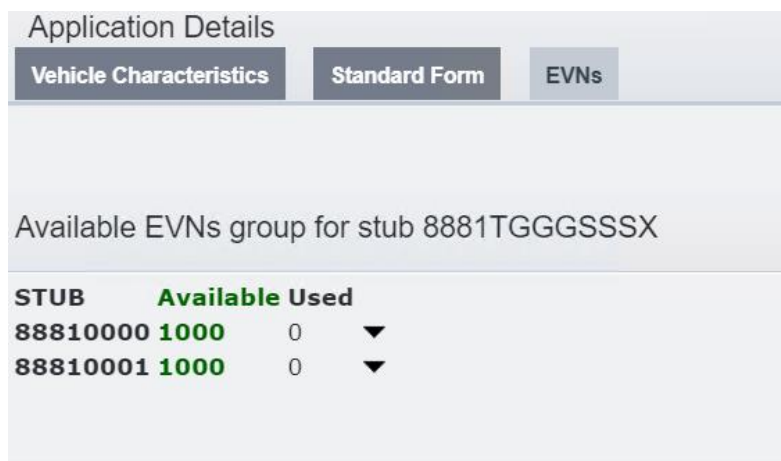

Figure 45: Submitted Pre-Reservation Application Decision: EVNs tab

- i. For each one of the proposed Vehicle Numbers, click on the  button next to it to expand the available Vehicle Numbers and select on from the list, and click on  :

Figure 46: Submitted Application Decision: EVNs tab – Select EVNs

- ii. Alternatively to the previous two steps navigate to the ‘Standard Form’ Tab and manually input the Vehicle Number in the 1.1 parameter.

Figure 47: Submitted Application Decision: Standard Form Tab- 1.1 Parameter

- iii. Click on 
- iv. The following dialog box is displayed

Figure 48: Pre-Reservation Approval Message

Optionally, to attention of the submitter of the application, you can add a comment or upload one more file.

- If you click on Approve
 - Application is approved
 - The submitter of the application is notified via email about the approval of their application
- If you click on Cancel
 - Action is cancel
 - Dialog box is closed

b. To Reject the Application

Step 3b: If the provided information reviewed in Step 2 are not acceptable, press  button.
the following dialog box is displayed

Figure 49: Reason for rejecting the Pre-Reservation application

Optionally, to attention of the submitter of the application, you can add a comment or upload one more file.

- If you click on Approve
 - Application is approved
 - The submitter of the application is notified via email about the approval of their application
- If you click on Cancel
 - Action is cancel
 - Dialog box is closed

2.4.3.2. *Application for Vehicle Registration*

The user can review and decide on whether he will approve or reject an application for vehicle registration following the below steps:

Step 1: Search for a Registration Application with “Submitted” Status and clicks on the “Actions” Button and redirected to the application:

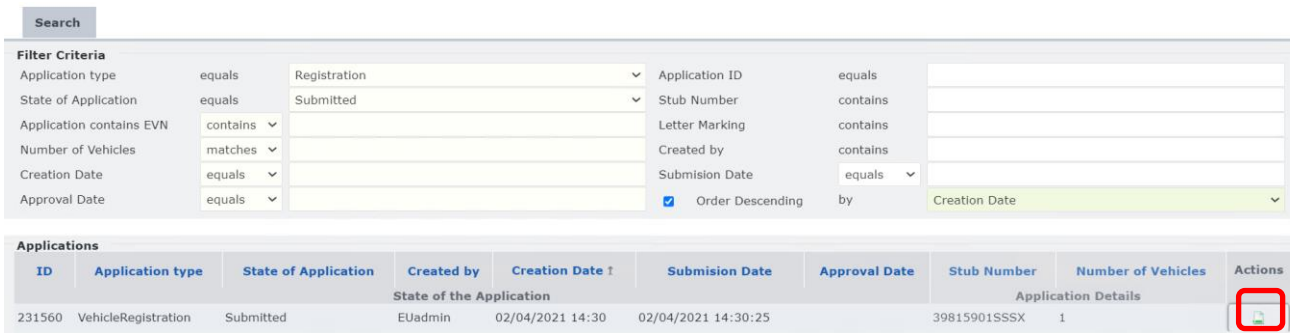

Figure 50: Submitted Reservation Application: Search

Step 2: Review the information provided for the Registration in the “Vehicle Characteristics” and “Standard Form” Tabs.

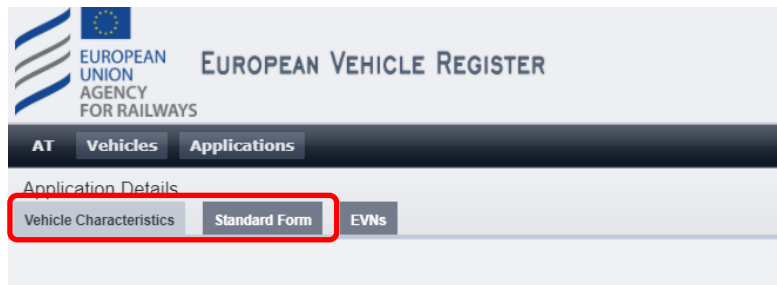

Figure 51: Review Application Details: “Vehicle Characteristics” and “Standard Form” tabs

a. To approve the Application

Step 3a: If the information provided in the application are found to be complete and acceptable after the review done in the previous step, follow the steps below:

i. Browse in the EVNs tab, the content of which can be viewed below:

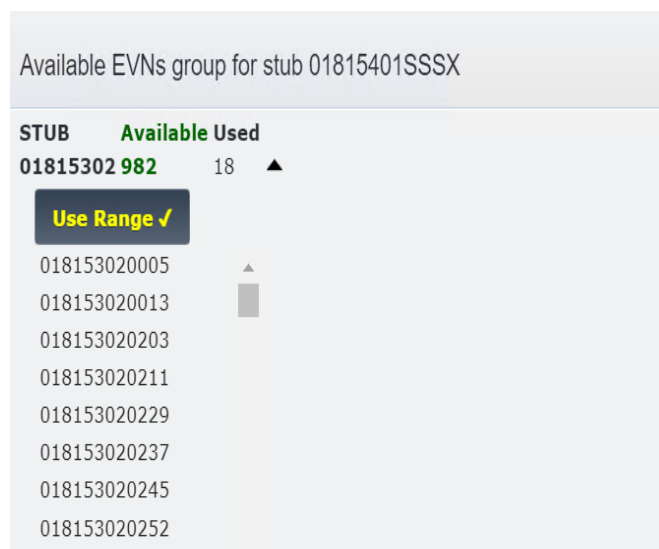

Figure 52: Submitted Registration Application Decision: EVNs tab

- ii. For each one of the proposed Vehicle Numbers, click on the  button next to it to expand the available Vehicle Numbers, select on from the list, and click on  :

Vehicle Characteristics **Standard Form**

Application Type: VehicleModification, UpdateRegistration | Current Application State: Submitted | Created by: EUadmin

Figure 60: Update of Registration: Vehicle Characteristics and Standard Form Review

a. To Approve the Application

Step 3a: If the information provided in the application are found to be complete and acceptable after the review done in the previous step, click on .

In case you click on Approve, the following dialog box is displayed

Figure 58: Update of Registration Data Approval Message

Optionally, to attention of the submitter of the application, you can add a comment or upload one more file.

- If you click on Approve
 - Application is approved
 - The submitter of the application is notified via email about the approval of their application
- If you click on Cancel
 - Action is cancel
 - Dialog box is closed

b. To Reject the Application

Step 3b: If the provided information reviewed in Step 2 are not acceptable,  button.

Then specify the reason for rejecting the application by completing the text field on the dialog.

User can optionally upload one or more files as part of the justification for rejection.

User then clicks on:

- "Reject" to finalize the rejection.

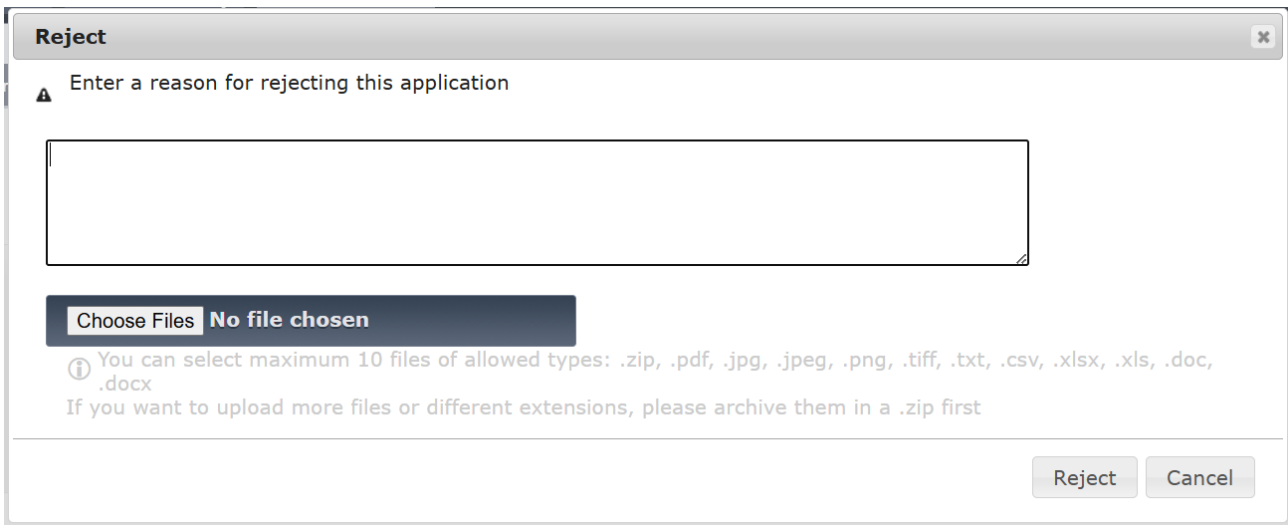

Figure 59: Reason for rejecting the Update Of Registration application

EVR marks the application as Rejected., and email notification is sent to the Submitter of the application.

- “Cancel” - to cancel the action
EVR will close the dialog box and action is cancelled.

2.4.3.4. Change of Keeper

The user can review and decide on whether he will approve a new Change of Keeper application following the below steps:

Step 1: Search for a Change of Keeper Application with “Submitted” Status and clicks on the “Actions” Button and redirected to the application

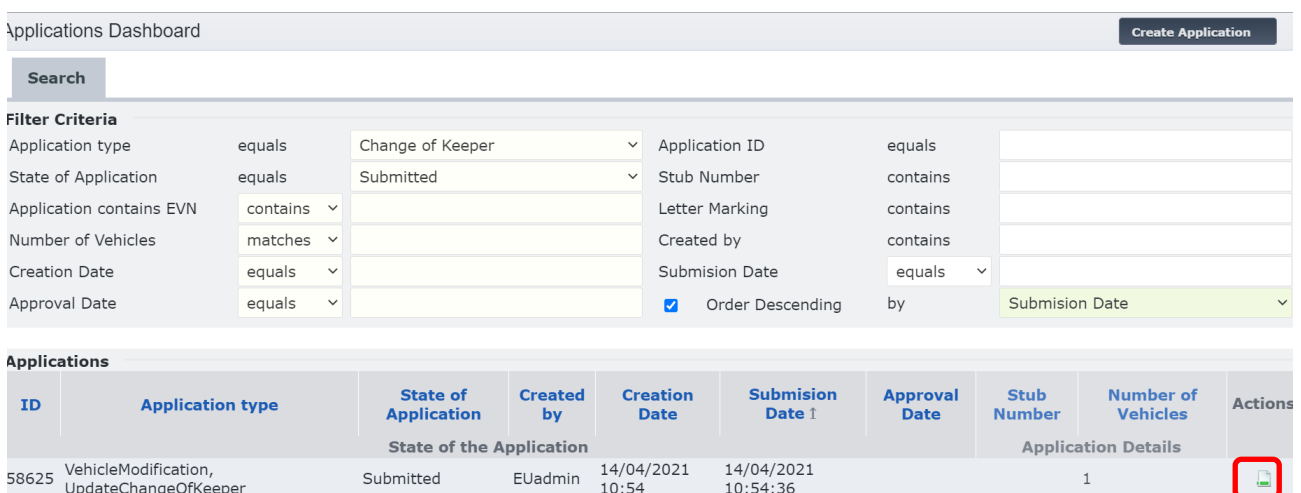

Figure 60: Submitted Change of Keeper: Search

Step 2: Review the changes that were made in the “New Values” Column for the Keeper Parameter of the “Standard Form” Tab

Figure 61: Review Application Details: “Vehicle Characteristics” and “Standard Form” tabs

a. To Approve the Application

Step 3a: If the information provided in the application are found to be complete and acceptable after the review done in the previous step, click on 

Then the following dialog box is displayed

Figure 62: Change of Keeper Approval Message

Optionally, to attention of the submitter of the application, you can add a comment or upload one more file.

- If you click on Approve
 - Application is approved
 - The submitter of the application is notified via email about the approval of their application
- If you click on Cancel
 - Action is cancel
 - Dialog box is closed

b. To Reject the Application

Step 3b: If the provided information reviewed in Step 2 are not acceptable,  button.

Then specify the reason for rejecting the application by completing the text field on the dialog.

User can optionally upload one or more files as part of the justification for rejection.

User then clicks on:

- “Reject” to finalize the rejection.

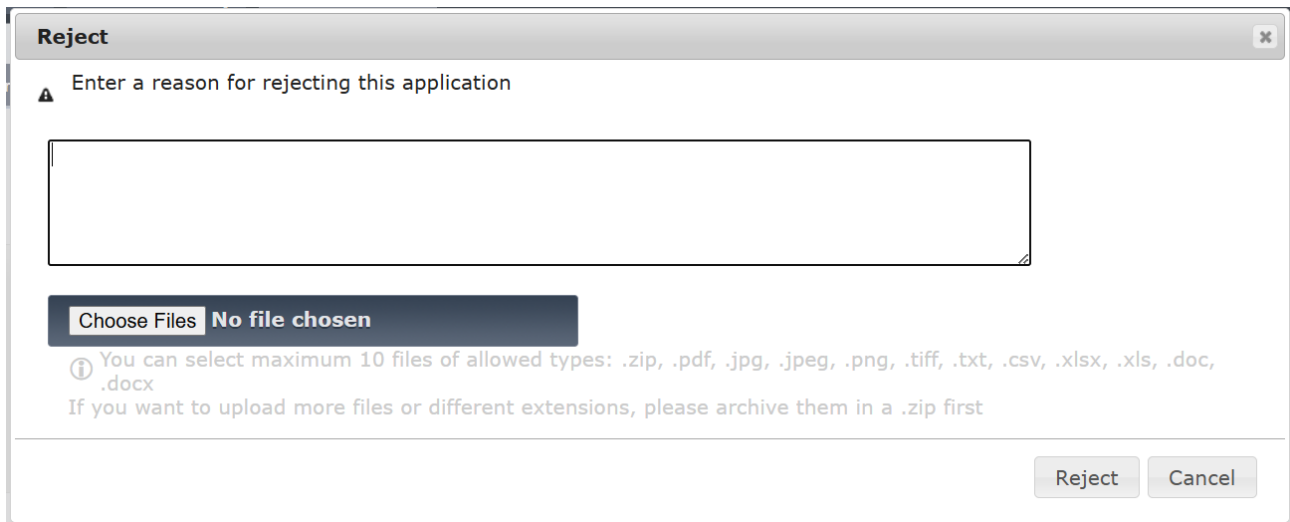

Figure 63: Reason for rejecting the Update Of Registration application

EVR marks the application as Rejected., and email notification is sent to the Submitter of the application.

- “Cancel” - to cancel the action
EVR will close the dialog box and action is cancelled.

The Keeper is notified via email on the outcome of the examination of his application.

2.4.3.5. Change of ECM

The user can review and decide on whether he will approve a new Pre-Reservation application following the below steps:

Step 1: Search for a Change of ECM Data Application with “Submitted” Status and clicks on the “Actions” Button and redirected to the application

Search

Filter Criteria

Application type	equals	Change of ECM	Application ID	equals	
State of Application	equals	All	Stub Number	contains	
Application contains EVN	contains		Letter Marking	contains

i. click on 

The following dialog box is displayed

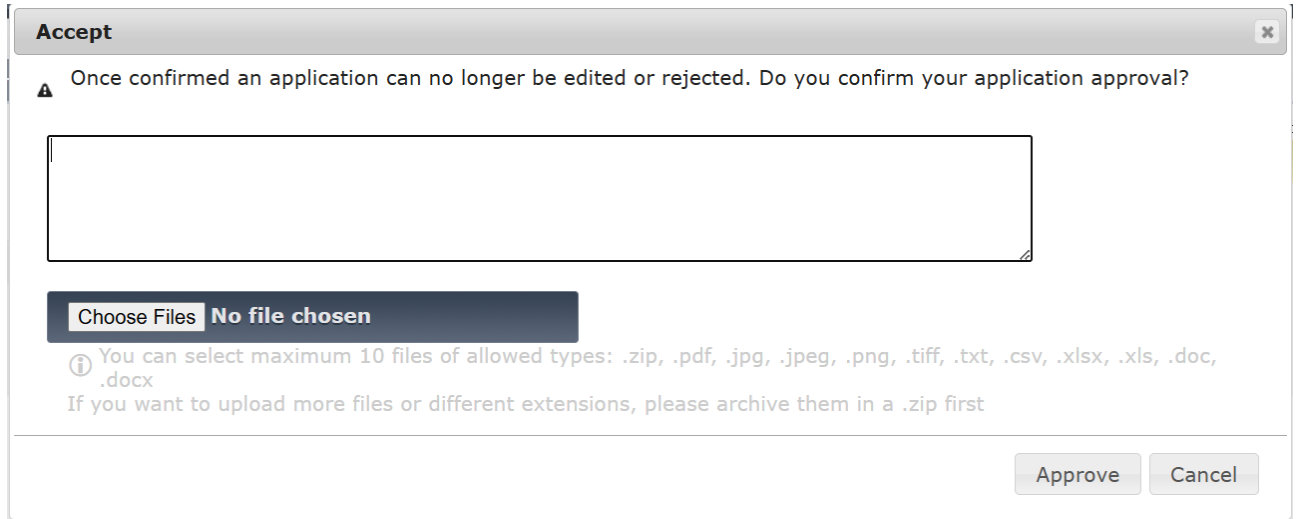

Figure 105: Registration Approval Message

Optionally, to attention of the submitter of the application, you can add a comment or upload one more file.

- If you click on Approve
 - Application is approved
 - The submitter of the application is notified via email about the approval of their application
- If you click on Cancel
 - Action is cancel
 - Dialog box is closed

b. To Reject the Application

Step 3b: If the provided information reviewed in Step 2 are not acceptable,  button.

Then specify the reason for rejecting the application by completing the text field on the dialog.

User can optionally upload one or more files as part of the justification for rejection.

User then clicks on:

- "Reject" to finalize the rejection.

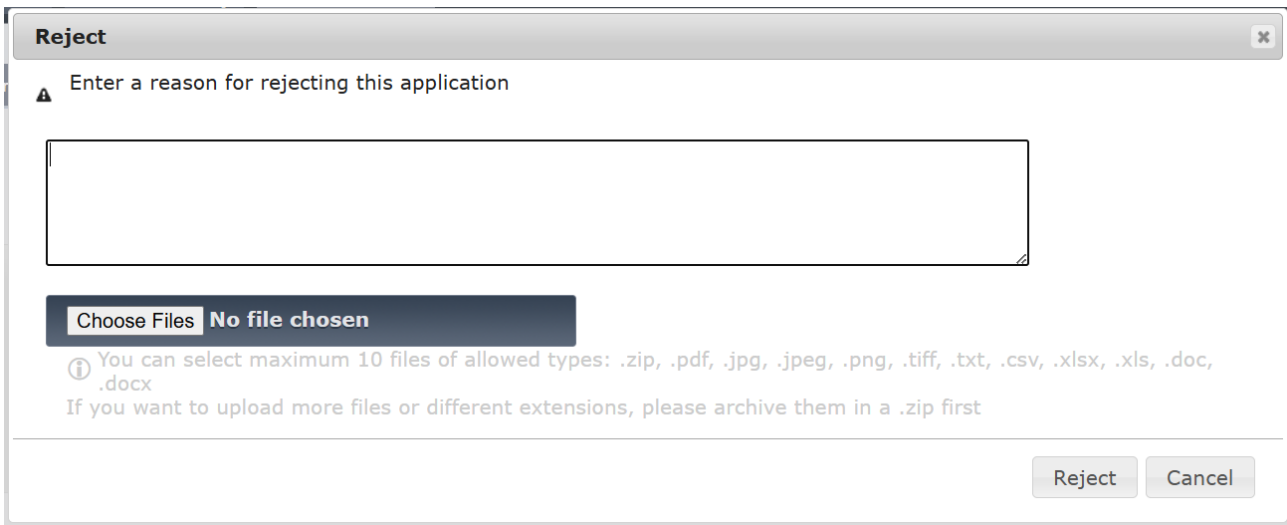

Figure 106: Reason for rejecting the application

EVR marks the application as Rejected., and email notification is sent to the Submitter of the application.

- “Cancel” - to cancel the action
EVR will close the dialog box and action is cancelled.

2.4.4. Create Application

As described in the previous chapters, the user can select the **Create Application** option. By clicking on this button, a new window will open in the browser, that will allow the user to select the Application type. The content of this window is displayed below:

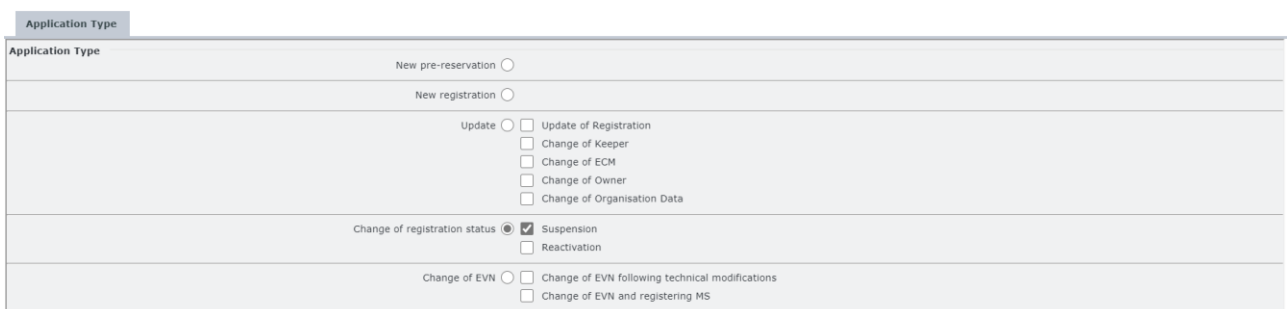

Figure 107: Create Application: Application Types

Details for the available Application types, and the steps required by the user to complete them are presented in the following chapters. To proceed to the next stage, the user must select the required Application type

and click on **Save ✓** on the options menu bar at the bottom of the page. Alternatively they can click on **Discard?** or **X Close** to exit.

The RE that will be have to examine the application will receive a notification email to examine the application.

The user that applied will be notified for the outcome of the examination.

In case of acceptance, the other stakeholders that are referred to the application will notified for changes on the Vehicle. This happens if the respective users have opted in for the respective notifications.

2.4.4.1. Suspension

It is possible for a RE user to apply for the Suspension of one or more vehicles at once, provided that they are registered in the MS of the particular RE. The user can apply for a vehicle Suspension by following the next steps:

Step 1: In the Applications page, click on the **Create Application** button.

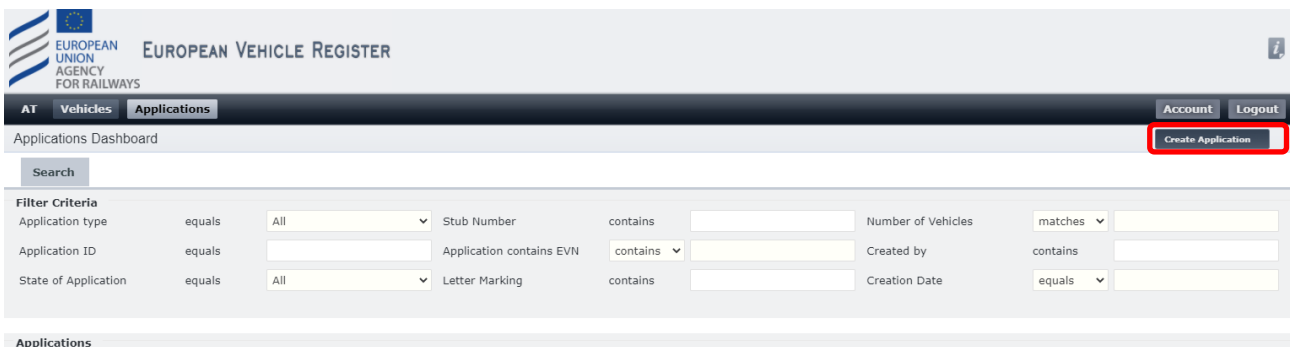

Figure 108: Create Application

Step 2: Select the “Suspension” checkbox from the Application Type page and click on **Save ✓**.

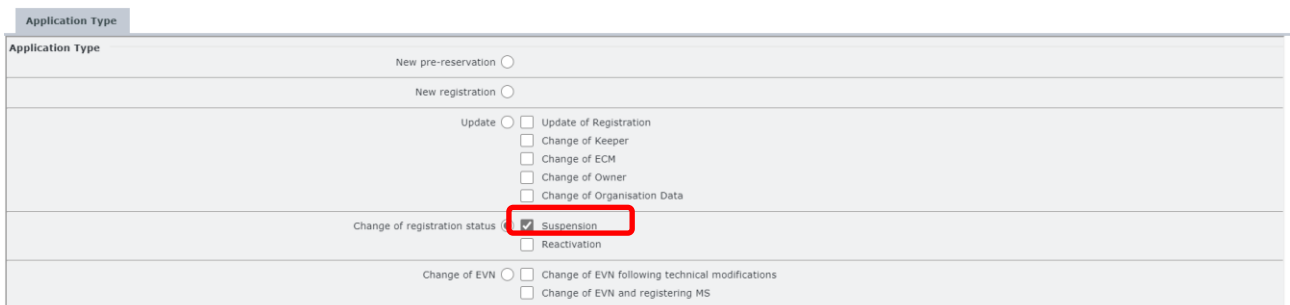

Figure 109: Suspension: Application Type

Step 3: In the “Vehicle Characteristics” tab, provide the EVNs that are related to the application, by typing them in the “EVNs” text field.

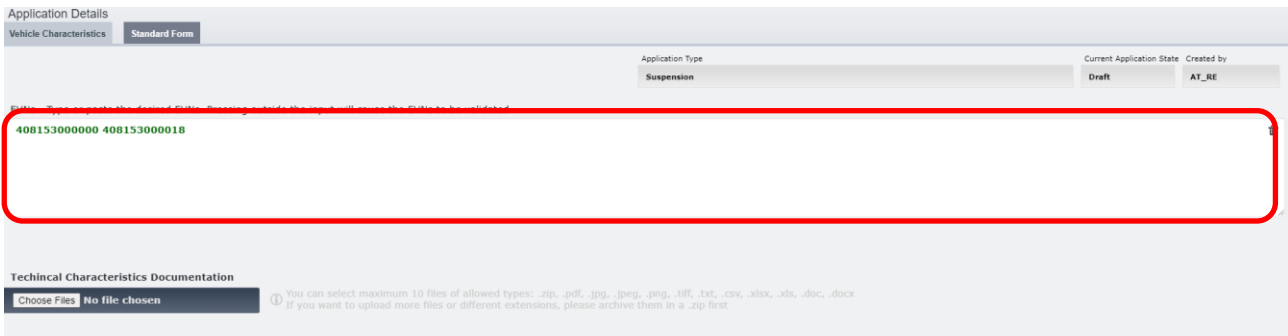

Figure 110: Suspension: EVNs field

Step 4: If applicable, in the “Vehicle Characteristics” tab, upload any Documentation by clicking on **Choose Files**. By using the pop-up window, the user can select any files from their computer and upload them by clicking on **Open**.

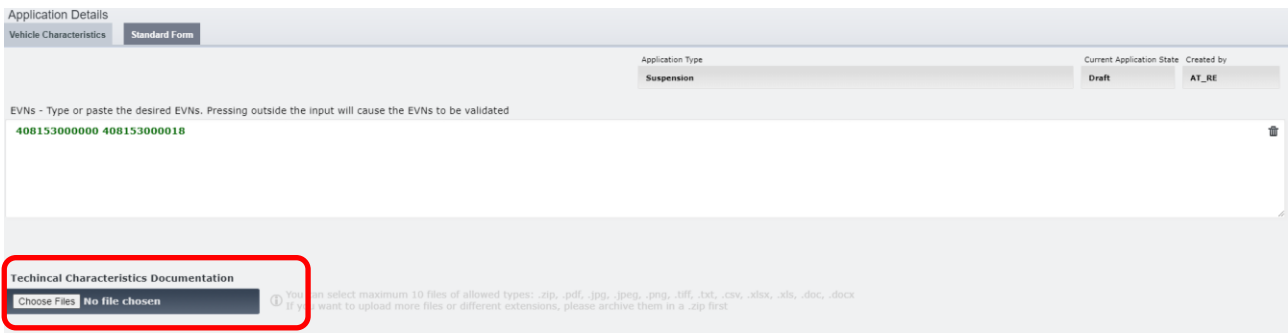

Figure 111: Suspension: Upload Documentation (1)

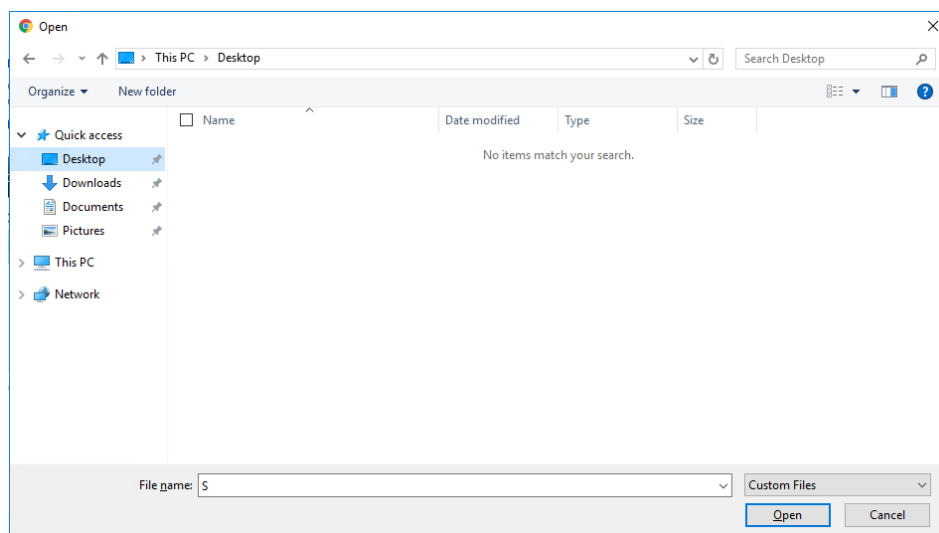

Figure 112: Suspension: Upload Documentation (2)

Step 5: In the “Standard Form” tab, complete field “10.1 Registration Status” by using the drop down menu of Parameter 10.1. In case of multiple Vehicle Numbers, the user can switch detail views by selecting the desired Vehicle Number from the “Vehicle details Preview” drop-down menu:

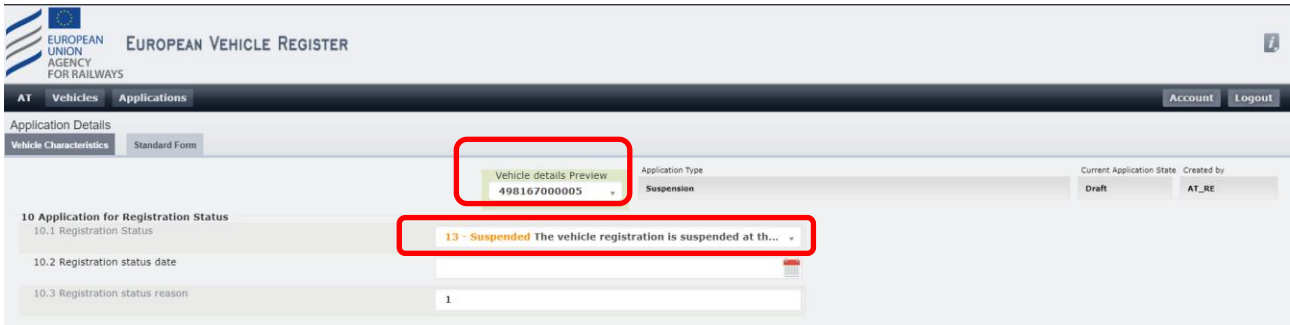

Figure 113: Suspension: Standard Form – Registration Status

Figure 114: Suspension: Registration Status Drop-down menu options

Step 6: Complete field “10.2 Registration status date” by selecting a date \geq today’s date.

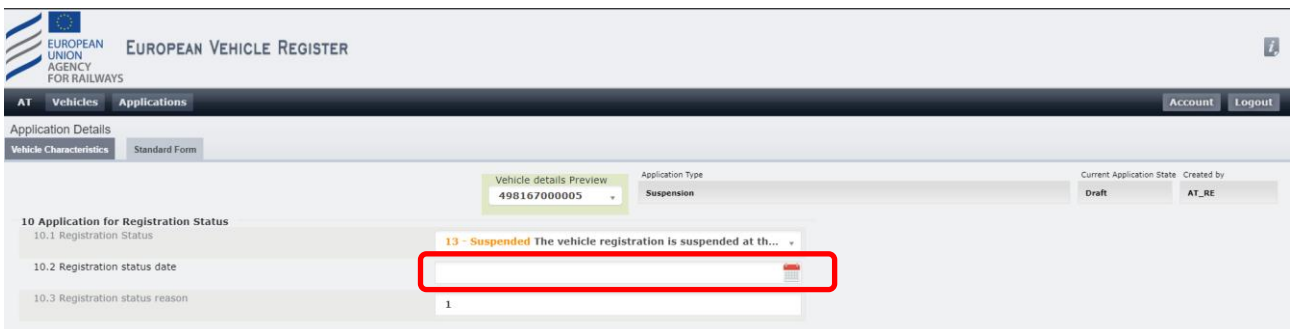

Figure 115: Suspension: Standard Form – Registration Status Date

Step 7: Complete field “10.3 Registration status reason” by filling in the text field. Depending on the user selection in field “10.1 Registration Status” there are the following 2 cases:

- If “**13 – The vehicle registration is suspended at the request of the NSA of the Registering Member State**” is selected, then field 10.3 remains empty.
- If “**14 –The vehicle registration is suspended by decision of the RE**” is selected, field 10.3 is mandatory

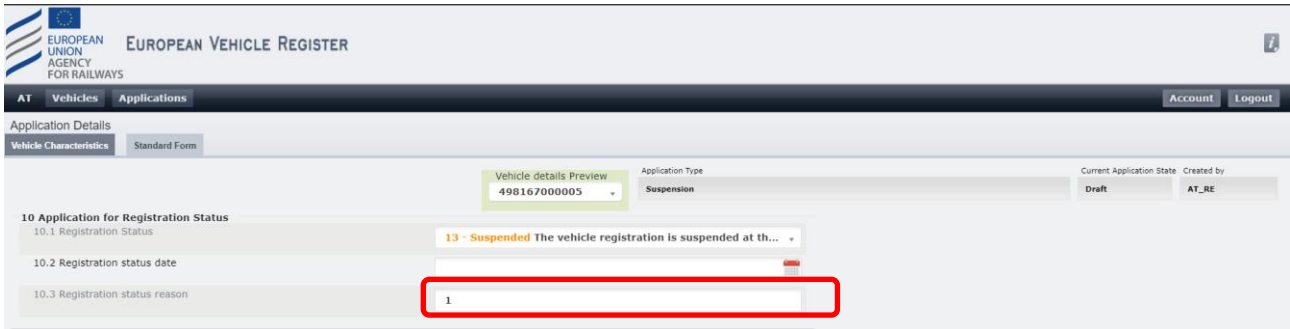

Figure 116: Suspension: Standard Form – Registration Status Reason

Step 8: Click on **Save ✓** to revisit the application at a later stage, or **Submit to RE ⇒** if it is ready for submission.

Alternatively, there are the following options at the bottom of the screen:

- **X Close**: to close the application without saving the progress
- **Refresh**: to refresh the application page and clear all the fields
- **Discard?**: to close the application and also delete the Draft created in the system.

Figure 117: Suspension: Standard Form – Action buttons

After submitting the application, the user will receive an email notification confirming the successful submission of the application. The application will be reviewed by an agent of the Registration Entity and the user will be notified via email once the decision has been made.

2.4.4.1. Reactivation

It is possible for a RE user to apply for the reactivation of one or more vehicles at once, provided that they are registered in the MS of the particular RE. The user can complete the Application for Reactivation by following the next steps:

Step 1: In the Applications page, click on the **Create Application** button.

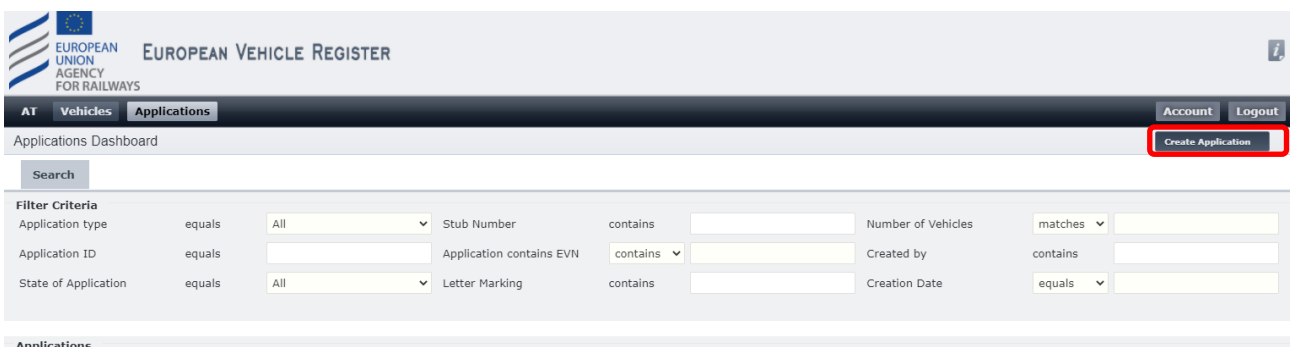

Figure 118: Create Application

Step 2: Select the “Reactivation” checkbox from the Application Type page and click on **Save ✓**.

Figure 119: Reactivation: Application Type

Step 3: In the “Vehicle Characteristics” tab, provide the Vehicle Numbers that are related to the application, by typing them in the “EVNs” text field.

Figure 120: Reactivation: EVNs field

Step 4: If applicable, in the “Vehicle Characteristics” tab, upload any Documentation by clicking on **Choose Files**. By using the pop-up window, the user can select any files from their computer and upload them by clicking on **Open**.

Figure 121: Reactivation: Upload Documentation (1)

Figure 122: Reactivation: Upload Documentation (2)

Step 5: In the “Standard Form” tab, complete field “10.2 Registration status date” by selecting a date >= today’s date. This is a mandatory field. In case of multiple Vehicle Numbers, the user can switch detail views by selecting the desired Vehicle Number from the “Vehicle details Preview” drop-down menu:

Figure 123: Reactivation: Standard Form – Registration Status Date

Step 6: Complete field “10.3 Registration status reason” by filling in the text field. This is a mandatory field.

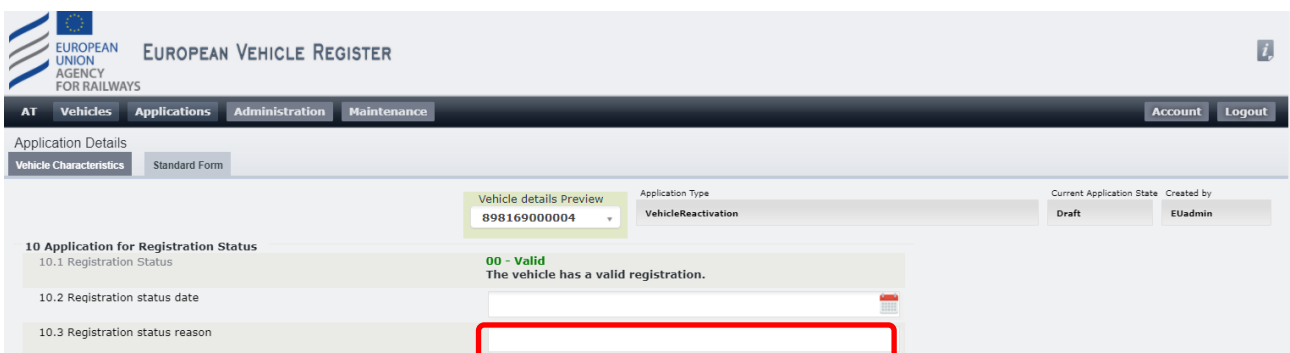

Figure 124: Reactivation: Standard Form – Registration Status Reason

Step 8: Click on **Save ✓** to revisit the application at a later stage, or **Submit to RE ⇒** if it is ready for submission.

Alternatively, there are the following options at the bottom of the screen:

- : to close the application without saving the progress
- : to refresh the application page and clear all the fields
- : to close the application and also delete the Draft created in the system.

The RE that will be have to examine the application will receive a notification email to examine the application.

The user that applied will be notified for the outcome of the examination.

In case of acceptance, the other stakeholders that are referred to the application will notified for changes on the Vehicle. This happens if the respective users have opted in for the respective notifications.

2.5. Vehicles

2.5.1. Search Vehicles

The user can open the “Vehicles” menu by clicking on the respective button on the Heading that is available in all the EVR Web pages.

2.5.1.1. Search Criteria

There is a number of Search Criteria that the user can define in order to perform their Vehicle search, as shown in Figure 125 below:

Figure 125: Vehicle Search Criteria

After inserting the desired criteria, the user can perform the search by clicking on the  button, as well as reset the search by clicking on the  button. The user also has the option to open a new search tab by clicking on the  button

2.5.1.2. Search Results

Once the user has clicked on the  button, any corresponding search results will be returned in a table format as show in Figure 126 below:

EVN ↓	Previous EVN	Manufacturing Year	Vehicle Type ID	Series	Registration regime	Registering Member State(s)	Status	Additional Conditions applicable to the vehicle	EIN	Details
028859020019		2024			Decision (EU) 2018/1614	BE	00 - Valid	TEN-CW	BE84848

Export Export All 10 Results 1-1 of 1 Reset Search

Figure 126: Vehicle Search Results

At the top, the user can see an indication of successful search and offline countries. At the bottom, the user can navigate the different result pages, and can also use this drop-down menu  to change the number of results that the system is displaying per page.

2.5.1.3. Export Option

The user has the option to export the search results by clicking either clicking on the  or  button.

If User clicks on  button:

- EVR exports to Excel or CSV file that search results with the columns visible on the search result grid.

User clicks on  button:

- EVR exports to Excel or CSV file that search results with vehicle data including information like Keeper’s, Owner’s, ECM’s , Home authorisation’s data.

In either cases, the system presents the following 3 options (XLSX, CSV and Cancel) as shown in Figure 127 below:

EVN ↓	Previous EVN	Manufacturing Year	Vehicle Type ID	Series	Registration regime	Registering Member State(s)	Status	Additional Conditions applicable to the vehicle	EIN	Details
028859020019		2024			Decision (EU) 2018/1614	BE	00 - Valid	TEN-CW	BE84848

Figure 133: Vehicle History: “Application for modification” history details view

Depending on the application type that the user will select, the details view will vary as indicated below:

- Update of Registration, Change of Keeper, Change of Owner, Change of ECM, Change of Organisation Data, Change of EVN following technical modifications, Change of EVN and registering MS → Modifications Detail View (Parameters before and after) with the changes introduced by that “update” application.
- Withdrawal, Suspension, Reactivation → Withdrawal Detail View (Parameter 10 – Registration Status, before and after values) with the change introduced by that application.

2.6. Allocation of EVNs to applications

2.6.1. Manually by the Registration Entity

The Registration Entity user can manually allocate the EVN by filling in the parameter 1.1 European Vehicle Number.

2.6.2. Via the EVNs tab

- Browse in the EVNs tab, the content of which can be viewed below:

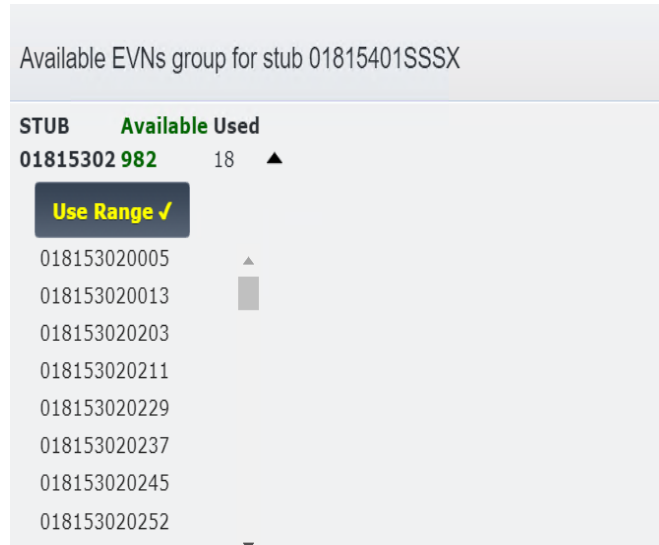

Figure 134: Submitted Registration Application Decision: EVNs tab

- ii. For each one of the proposed Vehicle Numbers, click on the ▼ button next to it to expand the available Vehicle Numbers, select one from the list, and click on **Use Range ✓**:

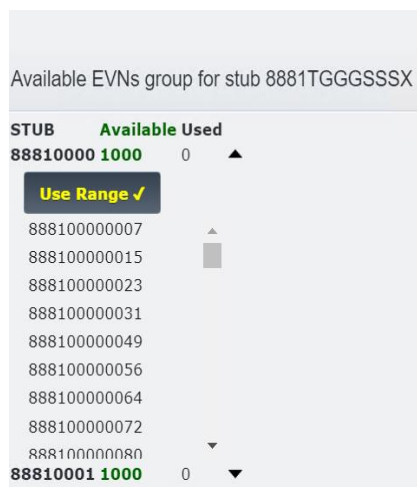

Figure 135: Submitted Application Decision: EVNs tab – Select EVNs

- iii. Alternatively to the previous two steps navigate to the ‘Standard Form’ Tab and input the Vehicle Number in the 1.1 parameter.
